

New casement platform focused on Energy Efficient Design

Window Depot introduces a newly designed casement line for new construction and replacement applications. This design has answered the need for strong structural and thermal integrity and aesthetic appeal.

- **Multi-Chambered, Welded Sash and Frame**—Improving thermal ratings by reducing heat transfer.
- **Aesthetic Contours and Detail** - This brand new casement design features site lines and contours that competitive casement windows do not have.
- **Energy Star Compliant**— Energy Efficiency is a top feature of this casement window. Current ratings and standards exceed Energy Star Compliancy.
- **R5 Rated**— 40% more efficient than common Energy Star™
- **DP 50 and Impact Rated**
